Defrauding the public of facts by the media sources are controlled by officials in New Hampshire, Governor Sununu, for decades? How honorable a process, U.S.D.O.J.

Sincerely, Elizabeth A. Rawnsley

NO ONE IS ABOVE THE LAW? "False Fact" forwarded on to us by many "constitutional scholars" of the law, who seem to feel as if their own duty is to cover up for illegal actions. Why? So, that they are able to make money or win elections, positions of power or simply gain access to how they are able to make money, interviewing with media corporations that defraud the public of many facts, during many campaigns and elections, in my neck of the woods.

Maybe, Jennifer Horn should focus on how she cleans up the mess in her own back yard, before she suggests that all the "sins" of the world fall on the shoulders of Donald J. Trump. He is surely supporting the corrupt nonsense but he is not alone and VP Biden will surely support the mess that has been in place for decades supported by people like William Barr, Robert Mueller and many legal scholars working in law firms and employed by our federal tax dollars for decades.

Sincerely, Elizabeth A. Rawnsley

Re: Media malpractice seems to service many personal agendas for so many state governing officials, right here in the State of New Hampshire for decades. Ask, the media resources in this region, who is in control of facts and truths? Free Press wishes to boycott "Facebook?" Who has been in control of the media industry for decades, right here in New England? Ask, Mark Zuckerberg, why I was finally shut down by his social media corporation. Who asked him to support such a process? I have questioned him and gives me no explanation or any accountability for his actions.

Re: U.S. Justice Roberts should be demanding some honesty of William Barr, of the U.S.D.O.J. and Lindsey Graham, of the U.S. Judiciary Committee. Congressional Oversight Members? Shame on them. Sincerely, Elizabeth A. Rawnsley

Mr. Duncan: You cover politics in South Carolina. You should be questioning Lindsey Graham on the reasons why one small state in the union feels as if they should be offered complete and total "immunity" by each president, during any time frame.

Sincerely, Elizabeth A. Rawnsley

Subject: Fwd: Bloomberg News: We won't investigate Mike during presidential campaign: Media Malpractice = Public corruption, at epidemic levels of development in government, at a local, state and national level of the presidency for "decades."

The U.S. Supreme Court: Justice Chief Roberts: Re: Impeachment Inquiry of the Trump Administration and Donald J. Trump. Many U.S. Senators were not fully informed of many facts, due to no fault of their own. Politics, prevails over truths, laws, and facts?

The "Friends of Fox News Corporation" have surely covered up for many violations of laws during many a presidency but we have put up with that immoral process and practice for decades, in this region. They make money defrauding the public? Many attorneys in other regions were not fully aware of many a process in the hands of the U.S.D.O.J. and the FBI, in Boston, MA, and Washington, D.C. during the presidency of Bush and Obama Administrations.

New Hampshire Advantage? They are offered all types of assurances and "immunity" by the feds and no investigations into any lawless conduct if attorneys are involved in the process? That is "unconstitutional" a process. Sincerely, Elizabeth A. Rawnsley

Maybe, people are so very tired of all the corruption covered up by the media industry. It seems to be catching up with immoral men and women employed in the legal industry. How long are we supposed to put up with the nonsense? Re: Media malpractice=Public Corruption at epidemic levels of support by William Barr of the U.S.D.O.J. and the Oversight Committee Members: Re: We have been witnessing the media industry covering up for illegal activities of governing officials for decades. The attorneys are in charge of all the false faces and false facts. How many politicians are attorneys? How many attorneys work in Congress and in the U.S. Senate? FBI? U.S.D.O.J.? Federal agencies all over the country? Oversight Committee in Congress? The U.S. Senate Judiciary? Office of Civil Rights? The U.S. Department of Labor? How many stonewalling a process is supported by the attorneys in these placements and in the state courts? FCC? Robert Mueller and his investigation cost how many millions of dollars paid to how many attorneys involving how many other attorneys for the people charged in that process? Robert Mueller III covered up for decades of corruption and fraud supported by these politicians in power and working in many federal agencies. That would include many of his own friends and affiliations employed in many law firms while he was employed by Bush and Obama's Administration. What about all the attorneys employed by many media corporations, newspapers, at a local, state and national level of employment? What do they suggest to be stonewalled from the view of the public? White House Staff? This entire process is a show put on by the Democrats and the Republicans in public service now. If they truly wished to hold anyone to any accountability then they would be holding William Barr accountable. The Oversight Committee Members have become stonewalls covering up for their own personal and political agendas, year after year. There has been "NO" oversight until now? Why? Because Vice President Biden's family is involved in corruption? What else is news? No one knows more about corruption than the Trump Administration. He came into the process suggesting that he was to "drain the swamp." It is an impossible task and he never intended on addressing any fraud or corruption involving any states in the union during his presidency or campaign for his next election. That is one of the reasons why we have so much corruption, year after year. No one wishes to hold any states to any investigations or accountability during the campaigns and elections. That is all politicians do now. They constantly raise money and find ways to "win" the next election. One big circle of injustices and the media has been the winners in this process. So much money paid and so many books are written by anyone involved in politics. Nancy Pelosi is surely not an honorable woman in power but she controls many of the Democrats and they are not able to investigate into anything other than what she feels is relevant. The attorneys are sitting in many elected seats and employed in many of the federal agencies and they are making everyone look pretty foolish suggesting that they are "Constitutional Scholars" of law. No one is above the laws? We never heard any phone conversations transcribed involving Bush or Obama's Administration. I am sure some of those conversations would become very interesting to hear or witness transcribed. The media industry has become way too involved in politics and personal agendas of political parties. We do not have investigative journalism but we do have so many people employed in that industry making money in a most deceptive manner. We should have been investigating into the illegal conduct of state attorneys and state officials during the Bush and Obama Administration. Yes, Trump's administration became involved in many "obstruction of justice" practices during his time frame in office. In a couple of years, he and many of the Republican politicians in power supported many illegal actions of our state

governing officials. Why did anyone stop any investigations into the "obstruction of justice" actions in the hands of the U.S.D.O.J. and the FBI? Alan Dershowitz of Harvard Law in MA? One hypocrite of Harvard Law, who seems to be so very supportive of Trump and how we are supposed to continue to cover up for injustices, in the hands of his legal counselors, Congress, and many U.S. Senate delegates serving both parties, during one more electoral a process?
