In 2018 I put in numerous complaints to various agencies that refuse to hold anyone accountable despite the fact that I am part of a Federally protected class under the [ADAAA](#). In July of 2018 the Manchester police responded to a call for a criminal trespass with 5 officers and a k9. I actually have a copy of their policy a k9 is supposed to be used for extreme threats not criminal trespass. I was roughed up by the officers I could not hear instructions the dog was barking the entire time and I am hearing impaired. I also was denied the revised bail conditions despite my son being at the Manchester police department to get me. Why do more serious offences enjoy PR bail but my son was informed she isn't going anywhere and I was transported to the Valley Street jail where I was assaulted by 4 staff members. I have a hospital report documenting my injuries. The officers said something that I couldn't hear to the jail staff. I was denied medical treatment by both the police department and the jail. I have hospital records of experiencing chest pain a week prior to my arrest. I was told an internal investigation would ensue by the AGs office. That didn't happen. The jail refuses to cooperate with discovery and the police station went so far as to take a complaint on the wrong form and I was belittled and laughed at by the officer taking my report as well as others within earshot as he made a huge production out of [it](#). My daughter's parental abduction was grossly mishandled by the Manchester police department they based their entire investigation on records from 2008 and perjured testimony from the abducting parent. Records from 2008 are not germane to an abduction that occurred in 2017. All of my attempts to address these issues are largely ignored and dismissed. I would like an opportunity to testify and produce documentation in person and have a CART reporter present to accommodate my hearing impairment. As a citizen who has the right to redress I feel it is of utmost importance to be able to address my concerns to the committee as all of my previous attempts for the past 2 years have been unsuccessful.
