

I want to thank the commission for giving me the opportunity to share my story and my experience of how law enforcement and the justice department - both state and federal levels conduct business here in New Hampshire. What I'm about to disclose is actual true facts supported by law enforcement documents as well by a memorandum. My name is Kosmas Koustas and I'm a victim both of law enforcement misconduct as well as professional misconduct committed by Attorneys who are supposed to uphold the Constitution of the United States and New Hampshire.

My constitutional rights were violated in such a manner, that it has prevented me from being able to defend myself properly. The main reason I believe I was investigated is due to me refusing to help assist law enforcement with their investigations in NH. When I refused to help assist law enforcement, they retaliated by investigating me personally and my family. My house and personal property were violated but to involve my family, which had nothing to do with my actions is wrong and despicable.

Law enforcement entered mine and my father's homes without warrants and executed searches. The judge used to authorize these warrants was a state judge - Paul Moore, who was later found guilty of falsifying his own documents. He also falsified the same warrants used to enter me and my family's properties. I reported this misconduct to the NH Judicial Committee and they did not want to even do anything about it, claiming the statute of limitations had expired when in reality it didn't. All the judicial misconduct evidence is explained on docket #JC-18-020-G and it even implicates its own vice-chair attorney Jaye L. Rancourt. She was the defense attorney that represented me during my suppression hearing.

The attorneys used to litigate my case on both sides (defense and prosecution) had a conflicts of interest that resulted in me suffering a lengthy prison sentence all because of their unethical conduct. Michael Lacopino and Jaye L. Rancourt represented a Government witness in the same conspiracy case I was charged with and this witnesses testimony was used in my Jenks material. Attorney General John Kacavas previously represented me in criminal state charges and later was involved in the investigation and prosecution of my Federal charges. My 2255 (1:18 -CV -738) motion explains all attorney misconduct and also is supported by a memorandum done by Attorney Victoria Kelleher out of Boston MA. Both sides were aware of each other's conflicts but neither side thought it was important to bring up in open court.

When I brought this up to my attorneys, I was minimized and told I did not know what I was talking about. After postponements and recommendations, I entered into a new plea deal in order to get out of prison and return to liberty to be able to help out my immediate family from the pain and suffering they were experiencing due to my incarceration.

Part of the new plea agreement was that part of my property be returned to me and my family. Till this day I still have not received anything back nor has my family.

It's factual that a personal vehicle that was towed and searched by the State Police was ordered to be returned to me by U.S Federal Judge, however it never was and ended up being retitled and sold.

Lastly the AUSA that was prosecuting the case, represented by U.S Attorney Terry Ollila, withheld evidence and threatened me with a drastic prison sentence - 25 years in prison if I was to go to trial and exercise my constitutional rights to challenge the indictments. Attorney Ollila was later found to have committed inducement during the trial and was taken off the case by her team.

The level of misconduct involved in my case also resulted in a co-defendant overturning his original conviction. During my investigation, the New Hampshire State Police with the aid of the Attorney General's office also concealed the prosecution of a NH State House Representative involved in a large opioid conspiracy. They also used a known convicted king- pin cocaine dealer who was an illegal alien, to try to entrap me.

This is only a short narrative of what has happened to me and there's a lot of reports of police misconduct during the investigation. Perjury is the misconduct used to obtain the search warrants executed against me. As a citizen of this country I don't believe our constitution supports this type of violations to our people. If we want to uphold the law we need to do something about this type of misconduct so its not repeated and does not continues. Thank you for listening
